## INSTALLATION

### SUPPLY

#### Batteries

Whenever convenient, use AC mains supply if you want to conserve battery life.

- Open the battery compartment (fig. 2).
- Insert as indicated eight (preferably Alkaline) batteries, type R20, UM1 or D-cells.
- Remove the batteries if exhausted or if they will not be used again for a long period.

The battery supply is switched off when the set is connected to the mains. When changing over to battery supply, pull out the plug from the AC MAINS socket ②.

#### Mains

- Check if the mains voltage as shown on the type plate corresponds to your local mains supply. If it does not, consult your dealer or service organisation.

*If the set is equipped with a voltage selector ② VOLTAGE, set this selector to the local mains voltage.*

- Connect the mains lead to the AC MAINS socket ② and the wall socket. The mains supply is now switched on.
- To disconnect the set from the mains completely, withdraw the mains plug from the wall socket.

#### Important note for users in U.K.:

When fitting a mains plug to the mains lead proceed as follows: The wires in the mains lead are coloured in accordance with the following code: Blue = Neutral, Brown = Live.

These colours may not correspond with the colour markings identifying the terminals in your plug, so proceed as follows: Connect the Brown wire to the terminal marked L or coloured Red. Connect the Blue wire to the terminal marked N or coloured Black. No connection is necessary to the earth terminal.

*Note:* This apparatus must be protected by a 3 Amp Fuse if a 13 Amp plug is used or, if any other type of plug is used, by a 5 Amp Fuse either in the plug or adapter or at the distribution board. If in doubt consult a qualified electrician.

### CONNECTIONS - fig. 1-2

For stereo headphones with 3.5 mm plug. Inserting the plug will disconnect the loudspeakers.

#### CD Output sockets CD OUT ⑤

Cinch-sockets for high quality Compact Disc reproduction (not radio or cassette) through an amplifier receiver, recorder, etc.

- Connect the CD OUT sockets ⑤ to the tape recorder input sockets REC IN, TAPE IN, LINE IN, AUX or CD IN of the other set.

The CD OUT output signal is not affected by the position of the controls VOLUME ⑥, GRAPHIC EQUALIZER ⑦ and DBB button ⑧.

## COMPACT DISC

### PLAYING A DISC

- Switch on the set with POWER switch ⑩.
- Set MODE selector ⑥ to CD (Compact Disc).
- Press CD △ ④ to open the disc cover.

- if you move the MODE selector ⑥;
- if you switch off the set with POWER switch ⑩;
- if the batteries get exhausted or if the power supply is interrupted in another way.

- To take out the disc, open the disc cover with CD △ ④. Press CD △ ④ only if the CD-player is in position STOP.
- Always switch off the set after use with POWER switch ⑩.

#### Remarks

— The CD-player is able to play the normal 12 cm disc as well as the small 8 cm disc 'CD-single'. An adapter ring for 8 cm CD-singles is not required.

— If the battery voltage is not sufficient any more for playing a disc, the CD-player will not start.

— If the display ③ shows 'E' for ERROR, the CD-player cannot read the disc. Possible causes are:

- you inserted the disc in the wrong way: the printed side should face up;
- the surface of the disc is badly scratched or dirty, see 'Maintenance';
- the lens ⑤ (fig. 5) is steamed up because of a sudden transition from a cold into a warm environment; do not clean the lens, but let the set acclimatize for a while.

#### How to play the stored selection

- If necessary, first press STOP □.
- Press PLAY ▶ and your selection is played.

It's not necessary to start the CD-player separately: if you press RECORD ●, the CD-player starts automatically (Synchro-Start):

- if the CD-player is in position STOP, recording will start from the beginning of the disc (or from the beginning of the stored selection);

### RADIO RECEPTION

---

- Switch on the set with POWER switch ⑯.

- Adjust the sound with the controls VOLUME ⑯, GRAPHIC EQUALIZER ⑯ and DBB button ⑯.
- Select the wave band using BAND selector ⑯.
- Tune to a radio station using TUNING knob ⑯.  
(*SW and LW not on all versions*).
- For FM, pull out the telescopic aerial. To improve FM-reception, incline and turn the aerial (fig. 3a). Reduce its length if the FM-signal is too strong (very close to a transmitter).
- For AM/MW and LW (Medium and Long Wave), the set is provided with a built-in aerial, so there is no need to use the telescopic aerial. The aerial can be directed by turning the whole set (fig. 3b).
- For Short Wave (SW), the telescopic aerial must be pulled out and placed in the vertical position. To improve SW-reception, vary the length of the aerial.
- When the FM MONO/STEREO selector ⑯ is in position FM STEREO and the FM STEREO indicator ⑯ lights up, you are receiving a FM-stereo transmitter. A disturbing noise, due to a weak FM-stereo signal, can be suppressed by setting the FM MONO/STEREO selector ⑯ to FM MONO. The FM STEREO indicator ⑯ will then go out and you will hear (*and record*) the FM programme in mono.
- Always switch off the set after use with POWER switch ⑯.

### CD-PLAYER AND DISC

---

- The lens ⑯ (fig. 5) should *never* be cleaned.
- The lens may steam up when the set is taken from a cold into a warm environment. Playing a disc is not possible then. *Do not clean* the lens, but let the set acclimatize for a while.
- Always pick up the disc by the edge and put it back in its box immediately after use.
- To remove dirt from a disc, breath on the disc first and wipe it off in a straight line from centre to edge using a soft, lint-free cloth. The use of cleaning agents may harm the disc.

### CASSETTE DECKS

---

Clean the parts ⑯⑯⑯⑯ indicated in fig. 8 after every 50 hours of operation or, on average, once a month.

- Open the cassette holder by pressing EJECT ■.
- Use a cotton bud slightly moistened with alcohol or a special head cleaning fluid.
- Press PLAY ▶ and clean the rubber pressure roller ⑯ (fig. 8).
- Then press PAUSE II and clean erase head ⑯, recording/playback head ⑯ and capstan ⑯.
- After cleaning, press STOP ■.

Cleaning of the heads ⑯ and ⑯ can also be done by playing the cleaning cassette SBC 114 through once as an ordinary cassette.

### Remarks

- The mechanisms of the CD-player and the cassette deck are fitted with self-lubricating bearings and therefore must not be oiled or greased.
- Fingerprints, dust and dirt on the apparatus can be removed using a soft, clean and slightly damp leather cloth. Do not use any cleaning agents which contain abrasives or solvents such as benzine thinner, alcohol, refined petrol or ammonia, since they may affect and harm the cabinet.
- Do not expose the set, batteries, discs or cassettes to rain or moisture, or, for any great length of time, to excessive heat from heating equipment or direct sunshine, e.g. in cars parked in the sun.
